Lead UX Engineer · Design Systems · WCAG & Section 508 Compliance

EXPERIENCE

Salesforce — Lead UX Engineer (Remote)

January 2022 – Present

- Contributing to an unannounced cross-framework initiative delivering design system components across React, Angular, and LWC for headless and AI-driven interfaces
- Led core frontend engineering on Salesforce Lightning Design System 2 (SLDS 2), translating architectural direction into production-ready implementations for next-generation Salesforce UI
- Rewrote the design token distribution pipeline, migrating from Theo to Style Dictionary to enable multi-format token output (CSS, JSON, Swift, and Kotlin), unlocking cross-platform flexibility and long-term system scalability
- Developed and shipped SDS Primitives, a foundational Web Components library powering Salesforce's Agentic UI Layer and AI-ready experiences
- Built and maintained accessible, documented React component implementations in Storybook, validating behavior across states, interactions, and use cases for enterprise teams
- Applied WCAG/Section 508 standards throughout component development using AXE, manual audits, keyboard testing, and screen reader validation
- Established and led a 15-engineer cohort of the SLDS Ambassadors program, driving an 8% reduction in help channel inquiries through cross-functional enablement
- Accelerated SLDS 2 adoption and reduced migration friction for 20+ enterprise customers through code reviews, screen shares, and technical presentations in a closed pilot program

Tech stack: JavaScript (ES6+), Web Components, HTML5, CSS3, CSS custom properties, React, LWC, Vite, Storybook, AXE, Git, Style Dictionary, Chromium, Claude, Cursor

WebstaurantStore — Senior Front-End Developer, Accessibility (Remote)

March 2021 – December 2021

- Audited and remediated design system components to meet WCAG 2.1 AA standards, improving usability for screen reader and keyboard users across a large-scale e-commerce platform
- Led accessibility onboarding and training sessions for engineers, raising baseline accessibility knowledge and front-end quality across the team
- Mentored junior developers through code reviews, reinforcing accessibility standards and design system consistency
- Partnered with UX designers and QA engineers to deliver accessible, semantically correct implementations across core user flows

Tech: React, Tailwind, LESS, JavaScript, HTML, CSS

Companion Protect — Senior Front-End Engineer (Contract, Remote)

January 2021 – March 2021

- Built foundational React components with Tailwind supporting white-label theming and scalable customization across multiple clients
- Authored implementation and usage documentation to ensure long-term maintainability and consistent adoption

Potomac Haven Inc. — Front-End Developer (Remote)

July 2017 – October 2020

- Embedded contractor at the U.S. General Services Administration (GSA), solely responsible for frontend development and UX across federal digital service platforms
- Designed and built the new Challenge.gov platform using USWDS, replacing a proprietary solution to reduce costs and standardize federal UX across multiple agencies

- Sole designer and developer responsible for the overhaul of CitizenScience.gov, refactoring legacy code, improving performance, and launching features that increased user sessions by 44%
- Organized and facilitated multi-agency user research workshops, translating cross-stakeholder insights into wireframes, prototypes, and improved user flows
- Conducted accessibility audits across federal platforms to ensure Section 508 compliance
- Contributed to the U.S. Web Design System (USWDS) during the 1.x to 2.0 migration, supporting UX research and bug fixes for a landmark release

EDUCATION

Hack Reactor — **Software Engineering Bootcamp**

October 2020 – January 2021

Full-stack training: ES6, React, Express, REST APIs, Node, relational databases

University of Massachusetts Lowell — **B.S. Information Technology**

2017

Minor: Web Design and Development

CERTIFICATIONS

- Claude Certified Associate - Foundations (Issued September 2026)
- Salesforce Certified UX Designer (Issued August 2022)
- Trusted Tester, U.S. Department of Homeland Security
- Web Accessibility Specialist (IAAP, Renewed 2026)

ADDITIONAL EXPERIENCE

U.S. Air Force Reserve — **Aeromedical Evacuation Technician**

November 2002 – November 2010

Performed in-flight medical care of wounded soldiers to include oxygen & medication administration, monitoring vital signs, wound care, airway control and personal hygiene needs. Maintained flight crew member qualification on C-130, C-17, and KC-135 aircrafts.
